TOTAL AMAOUNT OF VALUE TRASFERS R&D												
R&D	Value transfers for research & development											- kr

Transfers of value can be salary, fees or other compensation for work performed, as well as compensation for overheads in connection with the execution of the assignment (e.g. travel, board, accommodation). Donations and sponsorships to the health care system (HCO) are also reported transfers of value.

Health care professional (HCP) refers to a doctor, dentist, pharmacist, nurse or other health care personnel who have the right to prescribe, purchase, provide, recommend or administer medicines, including employees of pharmaceutical companies whose main occupation is in health and healthcare. Other employees of pharmaceutical companies or pharmaceutical distributors are not covered by the concept of health care personnel.

Healthcare organization (HCO) refers to any legal entity that conducts healthcare or research or teaching in this field, or is an interest organization with a medical or scientific focus.

Transfer of value for **research and development** means transfer of value to recipients in connection with the planning or execution of (i) non-clinical study (defined in the OECD Principles of Good Laboratory Practice), (ii) clinical trial or (iii) non-interventional study that includes collection of patient data from or on behalf of healthcare professionals.
